The Houston Museum of Natural Science welcomes Houstonians to explore during Spring Break 2022

HOUSTON — The Houston Museum of Natural Science comes loaded with fantastic science attractions for Houstonians, young and old. Roam the Morian Hall of Paleontology, venture into the Cockrell Butterfly Center, or duck into the Burke Baker Planetarium and travel thousands of light-years away from Houston without leaving your seat. Inside the Wortham Giant Screen Theatre, scale to the top of Mount Everest with the very special re-release of "Everest." Egyptian history lovers will find themselves immersed in the world of "Ramses The Great and the Gold of Pharaohs" and our very own Hall of Ancient Egypt, both showcasing awe-inspiring artifacts from centuries past. Also, experience "BODYWORLDS & the Cycle of Life" — complete with over 100 real, preserved human specimens. Don't forget to check out our satellite locations, HMNS at Sugar Land, and the historic George Observatory nestled inside Brazos Bend State Park, just an hour south of Houston.

About Houston Museum of Natural Science

The Houston Museum of Natural Science—one of the nation's most heavily attended museums—is a centerpiece of the Houston Museum District. With four floors of permanent exhibit halls, and the Wortham Giant Screen Theatre, Cockrell Butterfly Center, Burke Baker Planetarium and George Observatory and as host to world-class and ever-changing touring exhibitions, the Museum has something to delight every age group. With such diverse and extraordinary offerings, a trip to the Houston Museum of Natural Science, located at 5555 Hermann Park Drive in the heart of the Museum District, is always an adventure.
